

## DRESS GOODS SPECIALS

FOR THIS WEEK ONLY,  
HUNDREDS OF YARDS OF

## STYLISH DRESS GOODS

at prices almost cut in two, to create a week of rousing business in our Dress Goods Department, we have made such a deep cut in prices that the following unusual and attractive specials are bound to interest you, coming as they do, just when they are wanted:

## HOMESPUN SUITING

Gray mixed, 56 inches wide,  
\$1.00 quality ..... 80¢ yd.

## BLUE MIXED SUITING

56 inches wide,  
\$2.25 quality ..... \$1.25 yd.

## NOVELTY SUITINGS

56 inches wide, All New; Brown and  
Gray Mixtures,  
\$1.25 quality ..... 85¢ yd.

## BLACK SERGE

Double width, 90¢ quality ..... 60¢ yd.

## NAVY BLUE CHEVIOT SERGE

All Wool, 50 inches wide,  
\$1.00 quality ..... 80¢ yd.

## ALL-WOOL FANCY SUITINGS

50 and 54 inches wide,  
\$2.00 quality ..... \$1.25 yd.

## BLUE MIXED SUITING

All Wool, Double Width,  
\$1.25 quality ..... 75¢ yd.

## CAMELS HAIR PLAIDS

All Wool, 75¢ quality ..... 40¢ yd.  
\$1.00 " ..... 50¢ "   
\$1.25 " ..... 65¢ "

How Maguire Home Party  
Enjoyed Visit To The Flow

Mrs. J. Maguire of Kona, writing to Miss Mary Low under date of January 17, gives the following description of her trip to the lava flow:

I couldn't write to you last night because we only just got home 2 o'clock that afternoon from the Pele and we had been gone since Sunday. We left home about 5 o'clock Sunday afternoon. It rained nearly all the way—very thick fog and combined with the smoke made it intense, the night being dark and no moon, the road narrow, so our progress was very slow. We went in two surreys. Our survey contained John and myself, the driver and Clara who had met with an accident at Puuwaawaa. The other survey contained Miss Remington and Margaret and Mona with Lewi driving. We arrived at the Wallace's that night about quarter of nine. Stella left Kona that morning in a hired rig, met Manuwa in Waimea and picked up Hannah and Robbie at the Puuwaawaa gate on the road, and they arrived about 10 o'clock at McFarlane's. That left Huelme about 8 o'clock. That automobile did well in the rain, pitch dark and fog. Stella, Manuwa and Hannah said they never saw Mana fog so dark. I suppose it was the smoke.

We all started at 10 o'clock the next morning (Monday) the automobile ahead so as not to frighten our horses, then our carriage, the children's and the Wallace's, all of us provided with blankets, which we spread on the seat. I had been as far as Hooke, but beyond was all new to me, and we had a delightful drive, mostly through beautiful woods. It rained a little more than we liked, still we were all full of anticipation and in good spirits. Others came on and followed the procession. The Greenwells with an uncle made the way merry with music. Within about six or seven miles of the way, night fell, but the glow from the flow was so brilliant that we had no need of lighting our lamps and if we had a newspaper we could have read it easily. The fire grew more and more brilliant as we neared it, and when we reached Mr. August's tent, which was pitched on the roadside within two or three hundred feet of where the flow was making way to cross the road, a slight burst on our view and we could almost imagine that San Francisco was burning again before our eyes, only this was a flat panorama, no sky scrapers, the only substitute being the lehua trees growing scatteredly over the old lava, the fresh lava now and then running up a tree like some snake and lighting it up like a Christmas tree. The lava played strange freaks. It would encircle the base of a tree and leave it standing; others it would run up the branches and swallow it up almost at one lick, then others it would leave the charred remains like grim sentinels watching the ghastly destruction of its companions. The automobile was the favorite stand for viewing the panorama, and many availed themselves of the opportunity of viewing from it the awful grandeur of the spectacle.

Those more daring were content with nothing less than playing with fire, and coins were burned in pieces of glowing rock poked out from the red hot mass. About an hour after we arrived, the lava reached the edge of the road and seemed to hesitate. It banked up against the telephone post and seemed to be climbing it, then went right over it and across the road; after it crossed the road, it seemed to dash down at a rapid rate. Mr. August pulled out the telephone wire and we each had a piece as a souvenir.

Several of us viewed a magnificent spectacle from a high pile of old lava within ten feet of the burning mass, but about thirty or forty feet further right down through the middle of it was a molten stream of lava flowing at a tremendous pace, carrying huge boulders which floated down as lightly as feathers. I made the remark that it reminded me of a frozen river when the ice is melting and the broken blocks of ice are borne swiftly down the current. Then again it seemed like the pudding called floating island, where the white of the eggs have been browned just a little in the oven. A very homely simile, but to think that these huge boulders of rock were at such a white heat as to resemble the white of an egg and borne as swiftly and lightly as that article. Sometimes some of these floats would just burst into a thousand sparks without the least noise, just as Roman candles do in fireworks. Then there would be blue balls of flame and these were sulphur which were rather dangerous, as whenever they would burst, the fumes would almost suffocate one. Fortunately for us that night, the wind blew from the direction we were standing, and so away from us. It was impossible to remain too long as the heat was intense and the banks of glowing lava were always shifting, being pushed on by the force from behind. This flow is what is called a-a (clinkers) and not the smooth pahoehoe which runs like water. There would be a great mound formed which looked as if it was of charcoal, glowing hot underneath and it would burn till the whole mass was red hot and then fall over and roll and form another mound and so on; so you can see how slowly it travels. Where there is a hollow, the lava would fill it up till it toppled over. Where the descent is steep it rushes down with great force. That was a time when we could truthfully exclaim "Awfully grand!"

There must have been over 200 people up there that night. Natives on foot, horses, bicycles, every imaginable rig possible. Nearly every white family in Kona was up there. Dr. Goodhue and his family, their baby about 5 years old, was also there. Little Helen Matthewsman too. I hope I can go again. If it lasts weeks as it looks it is going to, I'll go again. I could have stayed all night, but the others wanted to go back to Huelme's old place and rest and also rest the horses. Stella, Ma stayed till morning, as Manuwa had to go in the daytime over part of that road on account of the weeds being so thick in the middle of the road and interfering with the chairs. We came back and had a good night's rest at the Wallace's and arrived home Wednesday afternoon about 2 o'clock. The Puuwaawaa folks got home that same evening about half past five. The automobile came right through to Puuwaawaa on Tuesday. We traveled 110 miles altogether and the Puuwaawaa folks 24 miles further. Stella travelled 230 miles altogether, but it was well worth it and she says she is ready to go again. No one regrets having gone. It is a sight one never forgets. I can still picture that river of fire and those white and sometimes golden masses floating swiftly down the current.

## AS KAMUELA SAW IT

(Special to The Bulletin)

Kamuela, Hawaii, Jan. 18. — So many conflicting accounts have been given of the eruption now in progress on the slopes of Mauna Loa that a description of the great event by an eye witness may not be out of place.

On Monday, the 14th, of January, about 100 people were congregated on the Government road leading to Naalehu, at a spot sixteen miles distant from this latter place.

Mr. August and wife had pitched a tent on the road and were the first on the spot, watching the molten stream of lava gradually approaching the road. The automobile from Waimea was the next to arrive, making the journey of 105 miles in ten hours with the Hind party. Four hours later some fifteen to twenty carriages arrived, bringing the aristocracy of Kona.

No words in the English language can express the magnitude of the sight. About eighteen miles mauka of the Government road directly on the land of Manuka, belonging to the Kahuku ranch, the crater in eruption was vomiting an immense stream of lava of the a-a type. At a short distance from the crater the stream divided into two, one branch, the nearest to Naalehu, having crossed the road on Sunday, reached the sea, or nearly so, the following night. The other branch traveled more slowly and at 4 p. m. Monday, when the auto reached the scene, the flow was about one mile mauka of the road.

At 9 o'clock p. m. it reached the road, which it crossed, having a depth of a-a of about fifteen to eighteen feet and 500 to 600 feet wide on the road, and then plunged down the precipitous slopes at the rate of two to three miles an hour.

Ohia trees measuring a foot or more in diameter were whipped into flames in about fifteen seconds, and each tree lit the scene as a flash-light.

Imagine a river in the springtime with the ice breaking up, and huge cakes of it tumbling over each other on their downward course, and you have the sight that met the eyes of the onlookers; with this difference: that the river in this instance was a mass of molten lava, red as blood and each mass of rock floating on its surface of the same weird, incandescent color. A few miles above the road an eruption of sulphur fumes caused a dozen or more blue lights to dance about on a red carpet of molten lava, extending over the slopes of a steep hill.

Whilst everyone was gazing in silent awe at the scene, some nervous person shouted out that a branch flow was descending in the rear of the people standing below the main flow. The excitement became intense. Mothers calling for their children, husbands for their wives, and vice versa, caused a thrill of agony and fear to pass over the crowd.

Mosses, Greenwell and Macfarlane performed acts of heroism in rescuing some young ladies from a tragic death. Finally when quiet was restored, it was discovered that the side flow had only advanced a few feet. Among the prominent witnesses of this magnificent scene were Mr. and Mrs. Robert Wallace and children, Mr. and Mrs. John Maguire, the Greenwells, Paris,

Curtis and Hind families, Dr. Goodhue, Rev. Dr. Baker, Judge and Mrs. Matthewsman, Wm. Wood, Mr. Macfarlane and a score of other ladies and gentlemen, besides fifty or more Hawaiians.

Toward the small hours of the morning, carriages began to draw away from the scene, and at 6 a. m., after the departure of the auto, Mr. and Mrs. August were left the sole spectators of one of the grandest and most awesome sights that human eyes can behold.

At the hour of leaving, the flow had traveled ten odd miles below the road in the direction of the ocean.

CORRESPONDENT.

## TRY LINDSAY TREATMENT

Waikuku, Maui, Jan. 19.—On January 4th, James Polani and two other young Hawaiians were before the District Court on the charge of larceny. At the request of the County Attorney sentence was suspended for a period of

## Saleswomen's Peril

GRAVE DISEASES, DUE TO STANDING  
Facts About Miss Merkley's Dangerous Illness and Complete Cure

Have you ever thought why so many women or girls rather walk an hour than stand still for ten minutes?

It is because most women suffer from some derangement of their delicate organism, the discomfort of which is less trying when they are in motion than when standing.

In some states laws compel employers to provide resting places for their female employees.

But no amount of law can regulate the hard tasks of these women. They must get the strength which this work demands and run the risk of serious diseases and the surgeon's knife.

Read the experience of Miss Margaret Merkley, 275 S. 3d Street, Milwaukee, Wis.

Dear Mrs. Pinkham:— "Gradual loss of strength, nervousness, bearing-down pains and extreme irritation compelled me to seek medical advice. The doctor said I had diseased organs and ulceration, and advised an operation if I wanted to get well. I objected to this and decided to give Lydia E. Pinkham's Vegetable Compound a trial. I soon found that all the good things said about this great medicine were true. The ulceration soon healed, backache, headache and nervousness disappeared, and in a short time I was strong, vigorous and perfectly well. I wish every working girl who suffers would try Lydia E. Pinkham's Vegetable Compound."

Lydia E. Pinkham's Vegetable Compound is a vegetable tonic which invigorates and strengthens the entire female organism, and will produce the same beneficial results in the cases of other sick women as with Miss Merkley.

## "Who's Your Tailor?"

The Value of  
Good Clothes

Women are attractive because they are women. But who shall deny that their attractiveness is not doubled by a wise study of the power of feathers? An indifferent-looking woman may transform herself to a siren by the mere twist of her hat; and wreck a thousand hearts by the glory of her gown. And why not? Man jests at this and with much philosophy assures us he loves her for herself; yet bows like a slave to her with the rustling silk.

In a different way 'tis the same with men. The poorly dressed is snubbed. His clothes are taken as his market value, and 'tis money that does the talking. The man whose clothes are cheap looking is called a "man"—even by the children—and he with the swell raiment is classified a "gentleman." 'Tis a pity, but 'tis true. The world judges us at first sight by the clothes we wear, and when you reason it out, what else can the poor world do.

Character, honesty and the cardinal virtues cannot be put on the surface, (and they do not suffer by association with good clothes), so for lack of something better, for the time being, at least, the world judges a man by what he wears.

WE MAKE SUITS TO ORDER from \$16. to \$50 AND GUARANTEE THE FIT!

COOKE REPORTS ON  
CHARITY FINANCES

Treasurer G. P. Cooke of the Associated Charities has prepared the following condensed report covering the period from January 1, 1906, to December 31, 1906:

Receipts—	
Balance on hand Jan. 1, 1906	\$933.40
Donations	1,289.85
Special donations to Mrs. E. F. Berger	2,533.00
	\$4,756.25
Disbursements—	
Manager's salary	\$1,500.00
Janitor's salary	90.00
Back salaries	82.50
Rent	300.00
Telephone Rent	30.00
Relief paid out by Treasurer	100.00
Relief paid out by Mrs. E. F. Berger	2,533.00
Expenses and incidentals	48.25

Balance Cash on hand Dec. 31, 1906	76.50
	\$4,756.25

## BEAUTIFUL PAINTING MARDI GRAS PRIZE

The Mardi Gras executive committee held a regular meeting in the League rooms last night. Rules and regulations for the coming masque ball were decided upon and will appear in the new Mardi Gras book.

A most beautiful oil painting, contributed by James Wilder, entitled "The Native Preacher," and valued at \$250, will be given as first prize to the lady wearing the handsomest costume at the carnival.

The floor committee and master of ceremonies are in favor of engaging the services of Professor Berger's full orchestra. The question of music was not definitely settled but it was voted that no expense would be spared to obtain the best. February 9 there will be another meeting at which the musical question will be settled.

## USEFUL DISCOVERIES

Are Not Always Startling. Neither Do They Create the Most Talk.

It is not always the greatest, most startling discoveries of science that are most useful to the human race.

Comparatively few people were directly interested in Herschel's finding of the new planet Uranus, but many thousands have been benefited by Prof. Unna's experiments, which proved beyond a question that Dandruff and Baldness are the results of the invasions of a parasitic germ which invades the roots of the hair.

The discovery of the true cause of baldness made Newbro's Herpicide possible. Herpicide effectually kills this germ. Destroy the cause, you remove the effect.

Sold by leading druggists. Send 10c in stamps for sample to The Herpicide Co., Detroit, Mich. Hollister Drug Co., special agents.

## BORN

COMPO—At Vallejo, California, Jan. 4, 1907, to Mr. and Mrs. Geo. L. Compo, a daughter.
